BAYMARD: WHY SHOPPERS ABANDON CARTS

Ridwan Adekunle
Shopify CRO & UX Designer

CONVERSION STRATEGY

You added Apple Pay. They still left.

SWIPE →

THE MYTH

They left because I don't take their payment method.

So you switched on three more wallets and waited for the numbers to move.

Ridwan - Shopify CRO & UX Designer

THE COUNT

23.48

FORM ELEMENTS IN THE AVERAGE US CHECKOUT

Baymard puts an ideal checkout at 12 to 14.
Your buyer is filling in the difference.

AVERAGE · 23

IDEAL · 12 TO 14

Ridwan - Shopify CRO & UX Designer

THE REALITY

Nobody abandons a checkout they can already see the end of.

40 in 100 leave over the total. 9 in 100 leave over payment choice.

Ridwan - Shopify CRO & UX Designer

WHERE IT SHOWS UP

Every one of these is a smaller fix than the total.

- ANOTHER WALLET BUTTON ×
- A SECOND TRUST BADGE ×
- EXIT POPUP, 10% OFF ×
- SHIPPING REVEALED AT STEP 3 ×
- ACCOUNT REQUIRED TO PAY ×

BUILD THIS INSTEAD

Full total on the cart page. Guest checkout. Wallets last.

Ridwan - Shopify CRO & UX Designer

THE FILTER

Can a first time buyer see the real total before they pick how to pay?

If not, no payment button you add will fix it. Convert first, then get clever.

Ridwan - Shopify CRO & UX Designer

Want to know where your checkout is leaking?

I'll walk your cart and checkout the way a first time buyer sees it.
