CONVERSION STRATEGY

You think an advertorial is a longer landing page. That's why cold traffic keeps bouncing.

THE MYTH

An advertorial is a landing page with more words.

Or a blog post you hope ranks one day. Both miss the job.

THE NUMBER

60%

CONVERSION ONCE THE GAP IS CLOSED

Cold traffic alone converts around 1.5%. The advertorial is the one page most Shopify brands skip.

Pattern across the cold-traffic funnels I've built.

THE REALITY

Its only job is making a stranger believe you.

Trust has to move first. The product comes after.

THE 3 BEATS THAT CARRY IT

Only 3 beats carry the weight.

1. The hook that stops the scroll
2. The proof that kills the doubt
3. The reveal that earns the click

The other beats just clear the path between them.

THE ONLY QUESTION THAT MATTERS

Does this page make a stranger believe you before it asks them to buy?

If not, it's just copy.
