FUNNEL STRATEGY

01

Your ad traffic isn't one audience. It's four.

The funnel that matches each one — and why sending everyone to the same page is costing you sales.

SWIPE →

THE PROBLEM

Most brands use one funnel for four different people.

Cold traffic. Warm retargeting. First-time browsers. Three-time store visitors.

Same ad. Same page. Same result:

money left on the table.

UNAWARE · COLD AUDIENCE

01

They don't know the problem exists yet.

An ad interrupted their scroll. No context, no intent, no urgency. Sending them to a product page here is like proposing on a first date.

FUNNEL PATH

META AD → ADVERTORIAL → PRODUCT PG → CHECKOUT

The advertorial tells a story, reveals the problem, then introduces your product as the answer. By the PDP, they're already convinced.

● PROBLEM AWARE · COOL AUDIENCE

02

They feel it. They can't name the fix yet.

Hair thinning. Never sleeping well. Skin not clearing. They know something's wrong — they haven't landed on a solution category yet.

FUNNEL PATH

META AD → LISTICLE → PRODUCT PG → CHECKOUT

A listicle validates their frustration, names the solutions, and puts yours on that list. They click through already half-convinced.

SOLUTION AWARE · WARM AUDIENCE

03

They've been comparing. You need to win.

They've Googled. They've tried things before. They know solutions exist — they just haven't committed to yours. A generic PDP won't close them.

FUNNEL PATH

META AD → LANDING PAGE → CHECKOUT

A dedicated landing page makes one case: why your product beats everything they've already considered. This is where the comparison gets won or lost.

MOST AWARE · HOT AUDIENCE

04

They know you. They just need the push.

They've seen your ads multiple times. They've been on your store. The trust is already there — every extra step between them and checkout is a leak.

FUNNEL PATH

META AD → PRODUCT PAGE → CHECKOUT

Skip the education. Send them straight to the PDP with a strong offer. Shortest path possible. That's how you close warm traffic.

THE COMPLETE FUNNEL MAP

Match your audience to the right path

← COLD — WARM →

UNAWARE	PROBLEM AWARE	SOLUTION AWARE	MOST AWARE
ADVERTORIAL	LISTICLE	LANDING PAGE	— SKIP — direct to PDP
PRODUCT PAGE	PRODUCT PAGE	CHECKOUT ✓	PRODUCT PAGE
CHECKOUT ✓	CHECKOUT ✓		CHECKOUT ✓
4-step funnel	4-step funnel	3-step funnel	3-step funnel

THE GOLDEN RULE

"

The shorter the gap between where your customer is mentally and what you're asking them to do —

the higher your CVR.

This is why funnel matching is the highest-leverage CRO move most brands aren't making.

MOST COMMON MISTAKE

COLD TRAFFIC → PRODUCT PAGE ✕

Sending cold traffic straight to your product page.

- ✕ They don't know you exist
- ✕ They don't know the problem yet
- ✕ Your PDP assumes both — so they bounce
